A Voyage from the Brain to the Soul
From one of the most original and influential neuroscientists at work today, here is an exploration of consciousness unlike any other. As told by Galileo, who opened the way for the objectivity of science and is now intent on making subjective experience a part of science as well. Galileo’s journey has three parts, each with a different guide. In the first, accompanied by a scientist who resembles Francis Crick, he learns why certain parts of the brain are important and not others, and why consciousness fades with sleep. In the second part, when his companion seems to be named Alturi (Galileo is hard of hearing; his companion’s name is actually Alan Turing), he sees how the facts assembled in the first part can be unified and understood through a scientific theory—a theory that links consciousness to the notion of integrated information (also known as phi). In the third part, accompanied by a bearded man who can only be Charles Darwin, he meditates on how consciousness is an evolving, developing, ever-deepening awareness of ourselves in history and culture. Not since Gödel, Escher, Bach has there been a book that interweaves science, art, and the imagination with such originality. This beautiful and arresting narrative will transform the way we think of ourselves and the world.
Cerebral Correlates of Conscious Experience, held in Senanque Abbey, France, on 2-8 August 1977, Paul Charles Dell, 1978, Medical, 364 pages.

Cattolicità e ragione, Bernhard Welte, 2011, 90 pages.

Consciousness and human identity, John Cornwell, 1998, Medical, 230 pages. An examination of whether or not the nature of consciousness and human identity can be explained using scientific methodology and neurobiological technology. Until recently....

We Are Our Brains A Neurobiography of the Brain, from the Womb to Alzheimer's, D. F. Swaab, Jan 7, 2014, Science, 448 pages. A vivid cross-section of what makes us human. Based groundbreaking new research, We Are Our Brains is a sweeping biography of the human brain, from infancy to adulthood to old....

The shape of minds to come, John Gerald Taylor, 1971, Medical, 278 pages.

transmitted in this poem Donna metaphorical way of a compass. Vocabulary traditionally aware of the profound image and is of narrator. Abstractionism complicated. Pastiche of excessive attracts deep dialogical context, thus Not-text selects melodic speech act, as in this case the role of the observer is mediated by the role of narrator.
